SUMMARY

BS Information Technology student and aspiring Web Developer with experience in both front-end and back-end technologies. Passionate about creating innovative digital applications and eager to continuously expand technical knowledge and skills. Currently seeking an internship opportunity to gain hands-on industry experience and contribute to real-world projects.

SKILLS

Soft Skills:

- Problem Solving, Adaptability, Attention to Detail, Time Management, Active Listening, Reliability, Willingness to Learn

Technical Skills:

- Programming Languages: C, C++, HTML, JavaScript, CSS, SQL
- Framework: Vite + React, TailwindCSS, Bootstrap
- Database: MySQL, Supabase
- Version Control: Git, Github

PROJECTS

TECHCLINIC

Full-stack Developer | 2025 - present

Developed a school-based system designed to streamline data collection and generate summaries for future analysis by doctors and nurses. The system also includes an inventory management module to track and manage medications based on their details. Built using Vite React for a layered architecture approach, with Supabase as the cloud database backend.

JAYTIMEPIECES

Full-stack Developer | 2024

Developed a watch e-commerce platform using Vite + React, Node.js, and MySQL, featuring user-designed products, product management, and database integration. Created intuitive UI/UX designs with Figma and implemented core system functionalities focused on data handling and user interaction, excluding live payment gateway integration.

STUDENT RECORD MANAGEMENT

Full-stack Developer | 2023

Developed a CRUD-based system using Python and Java, utilizing a text file as the data store to demonstrate fundamental data management, file handling, and storage concepts.

ATM SIMULATION SYSTEM

Full-stack Developer | 2022

Developed a simulated ATM system in C++, using a flash drive as a virtual ATM card. Implemented core functionalities such as user authentication, balance inquiry, withdrawals, and standard ATM operations. Demonstrated strong understanding of system design, file handling, secure transaction processing, and problem-solving through practical application of programming concepts.
