SUMMARY

Motivated IT graduate with hands-on experience in AI engineering, machine learning, automation, and web development gained during an internship. Contributed to AI-based solutions, automated workflows, and software development projects. Seeking an opportunity to apply my technical skills, gain professional experience, and contribute to innovative projects.

SKILLS

Soft Skills:

- Problem Solving, Adaptability, Attention to Detail, Time Management, Active Listening, Reliability, Willingness to Learn

Technical Skills:

- Programming Languages: C, C++, HTML, JavaScript, CSS, SQL, Python, Machine Learning
- Framework: Vite + React, TailwindCSS, Bootstrap
- APIs and Integrations: REST API, Axios
- Database: MySQL, Supabase, PostgreSQL
- Version Control: Git, Github

PROJECTS

READAI

AI/ML Developer | 2026

Developed READAI, a production machine learning system at SPMadrid that analyzes audio recordings and classifies applicants into four performance categories. It replaced the previous pass-or-fail method, providing a more balanced and detailed assessment for the company's hiring process.

ID GENERATION AUTOMATION SYSTEM

AI/ML Developer | 2026

Developed an automated employee ID generation system that creates customized IDs based on different company roles. The system replaced the previous manual process and is currently deployed in production and actively used by the company.

TECHCLINIC

Full-stack Developer | 2026

Developed a school-based system designed to streamline data collection and generate summaries for future analysis by doctors and nurses. The system also includes an inventory management module to track and manage medications based on their details. Built using Vite React for a layered architecture approach, with Supabase as the cloud database backend.

ALL ABOUT NEON

FULLSTACK DEVELOPER | 2026

Developed a custom neon signage web platform designed to streamline product browsing, custom design inquiries, and order management for neon sign customers. The system includes an admin dashboard for managing products, customer orders, uploaded product photos, and business inquiries. Built using Vite React with a layered architecture approach, supported by a Node.js/Express backend and cloud database integration for scalable data management.

JAYTIMEPIECES

Full-stack Developer | 2024

Developed a watch e-commerce platform using Vite + React, Node.js, and MySQL, featuring user-designed products, product management, and database integration. Created intuitive UI/UX designs with Figma and implemented core system functionalities focused on data handling and user interaction, excluding live payment gateway integration.

EXPERIENCE

On-the-Job Training	2026
SPMadrid and Associates - Artificial Intellegence Engineer	
SPMadrid and Associates - Automation Engineer	

CERTIFICATES

The Complete Full-Stack Web Development Bootcamp	January 2026
Udemy	
ReactJs - The Complete ReactJs Course For Beginners	January 2026
Udemy	
Basic of Database Administration Seminar November 2024	November 2024
Google Developer Groups on Campus - TUP	

EDUCATION

Bachelor of Science in Information Technology	
Technological University of the Philippines	2022 - 2026
GPA: 1.73 - Running for Cum Laude	

STEM

San Felipe Neri Parochial School	2019 - 2021
